Re: Underground Injection Control Permit #NV504000001

Dear Mr. May:

This is to inform you that the public comment period for the subject permit closed on September 5, 2004. No comments were received by the United States Environmental Protection Agency, Region 9 Ground Water Office during the public comment period, therefore no response to comments has been prepared. The enclosed final permit is effective for a period of five (5) years starting September 7, 2004.

As described in the subject permit, the injection wells regulated by this permit may only inject sanitary waste generated at the Pineview Subdivision located near Minden, Nevada. Please note that there are several permit conditions that must be met before authorization to inject is granted.

Please call Eric Byous at (415) 972-3531 if you have any questions regarding this letter or any other Underground Injection Control Program issue.

Sincerely,

A handwritten signature in black ink, appearing to read "D Albright", with a stylized flourish at the end.

David Albright
Manager, Ground Water Office
